PRELUDE

I Paul Pantone have been victimized by the hands of city County state and federal authorities including please officers and the American judicial system. I feel the general public should know of these events as they happened. I will only have a short summary of these events at this time. I have prepared to release the plans on how to use my technology to power every piece of equipment on this planet using just water.

I made a promise the public many years ago and I will not be shut down as hundreds of inventors and people before me. Of the over 500 locations that are now holding these plans they have been informed to release this information to all of mankind, as my final gift, but only if I am harassed, or arrested, or it or am under the threat of death.

My goal for most of my life was to get technology out to help all of mankind. My goal seems to be interfering with the goals of oil companies, pharmaceuticals, and governments from around the world.

Before anyone on this planet will be able to use all of these things brought to help the entire planet and all of mankind a thought process must be cleared up. I hope the contents of this book will bring to your attention what you may be doing wrong or maybe just the people around you and how to fix problems.

Chapter 1. The beginning years

It begins in 1950 when I was born. But I was five years old before my mother taught me how to remember my dreams. She told me that after dream I needed to wake up and write it down as quickly as possible. She explained to me that this would bring the dream from my subconscious to my conscious mind. Lastly I would not experience many de jevu experiences many others say they had. Predictable as a de javu is no more than the conscious mind realizing what you just went through seems to be in your memory already.

At a very young age I began remembering my dreams and writing them down upon awakening. Some of these dreams: taught me how to build magnetic motors; engines that would run on water: and many other discoveries, important to science.

There were many times I remember looking at my clock before going to sleep, then waking up from a dream and looking at the clock again and saying I'd only been asleep for less than 30 minutes. Yet in my dream, I spent many days building things that didn't work, in an effort to finally achieve success. When I awoke I only wrote the successful stories of what did work. But I remembered all the failures, and why they didn't work.

There were many times during these dreams I saw specific details of events, some not so good, that were about to occur. When I compare my notes and went over the details with my mother she had explained to me that there were seven kinds of dreams. She taught me

how to become more observant in my dream so I could make determinations as to whether I was me or whether I was actually having a dream of someone else having that situation.

Somehow it seems you can focus and lock in to another persons frequency without being aware of it. This can be done in may ways. You can simply hold a picture of that person, or an item that belonged to them. My strongest contacts were of physical nature. But as I got older it was people or animals in my proximity of a few hundred feet.

If in my dream I was no more than observer, it was a way for me to know events before they happened so that I can stay calm when others were panicked during emergency situations. As an observer it was not my job to try to stop events from occurring, but merely to know they were going to happen. But if I had a dream where I was to help someone in a dream that was my obligation to help that person, even if it was an enemy.

My mother made clear to me that I should never interfere unless I knew I was to be involved in resolving a problem or situation. This was very difficult for me. Even at five years old I always wanted to help others. But many time after helping others, I was treated as an outcast. In the beginning I did not understand it is human nature. It seems as people really do fear things I do not understand.

Many times when I was 5 to 10 years old, I warn people of what might happen, only to be verbally attacked later for having caused these events. In this day and age, one does not want to admit that they might know where a body is the fear that you become the first suspect for putting the body there. People cannot accept the fact that some of us have the same gifts, or in some cases curse, that Edgar Casey had.

Very difficult as a child to understand why I can do all the things that I could. But as far back as I can remember I cannot remember wanting to play with children my own age. It is not very important to me to have fancy things, nor did I want to be rich. As a matter of fact we were so poor up until I was about 12 years old I remember many times have you lot dumpster diving with my mom and little brother Rocky and recycle newspaper cardboard or anything else we can find so we would have groceries. So I do know what being poor really is.

I can remember that when I was six and seven years old very clearly. I was sound was more interesting to talk to old people and killing their knowledge. If I can sense that they felt comfortable with me I would always ask them if they can go back and change anything in their life what would be the first thing they want to change. I'll never be able to get the answer that was number one. But most of them said they would change their job because they really hated what they had done for years. My curiosity always got me on that so I would ask why. The answer was pretty simple, fear.

There are always afraid they could not found a better job so they stuck what they could do. The second most common answer was even more surprising. Most of them couldn't stand their spouse. That one really hurt it made me feel very insecure and wanting a relationship. Most of them said they did marry for love, but it changed. Yet they were afraid that they couldn't do any

better. This was very sad to me and I did not want to get married to someone that I would not want to be with the rest of my life.

The third most popular response was her children. Sad to say that most parents don't feel the children turned out the way they wanted them to. I sure didn't want that feeling. The starting at 5 and 6 years old I was able to come up with conclusions that I didn't want this to happen to me.I really want to find out what made people happy and content that they had done everything to enjoy the life they had.

Many people assume, that I'm very rich. This is not the case. When trying to help mankind one learns to live on a very tight budget. I seem to always put helping mankind ahead of other desires, not needs. Oh yeah I would love to go into Kenny Rogers or other great performers concert but I could not justify the expense knowing that that money could have been used for purchasing tools equipment or labor to build another invention. Some people think I'm a highroller. Not the case. A lot of my close came from Walmart or Salvation Army. I do usually eat one meal a day sometimes it's only a sandwich.

I usually do not go to theaters as I find their waste of money. But during the last year I went three times with the secretary. I guess considering it's been over 20 years since the last time I went to the theater I was being very wasteful. I am not attended any sports event since I was 12 years old and I don't feel I missed anything.

At 12 years old and the first skateboard. It was not but why is 5 feet long with two handles on front so my little brother could sit on the front while I powered it down the road. Then I decided to put a saline living in California. One day I went went to Palmdale California we were not able to slow the skateboard down when we drove through the only intersection in town with the signal on skateboard against a red light. A nice police officer gave me and my brother ride home in The skateboard.

It was a few weeks later I took a piece of plywood and cut to 24 inch circles, and sand the edges smooth. While writing these words down the wet lawn school, I lost control of my board and it went through the front window of the classroom. My brother and I grab the other board and ran home quickly. About a half hour later an officer came by the house to pick up the other board that we were seeing carrying away. Years later I did a search on patents and found the skimming board and skateboard were both patented only a few months after they were taken away from us.

I would have to say that I had an average of four or five inventions every year that I would tell people about, only to see them in stores at a later time. By the time I was 18, I realized the number of people that would want to take credit for your work with a high percentage of people. I decided that from then on if I invented a new tool style clothing or anything else I would simply keep it to myself, or I would tell people I bought it at a store and I would make up the location of where I bought it. Because people thought it was already patented they did not try to steal the ideas.

The time I was 11 I quit telling my dreams to people because of the number of times when bad things happen they would blame me for dealing with Satan. Pretty sad when God gives you gifts to help mankind and mankind doesn't want.

Now don't get me wrong, some people do want the knowledge. If I told you that you are going to be here this afternoon by a big truck making a left turn at a certain intersection and you chose to drive to that intersection and get it I cannot understand how you can blame that on me.

When I was growing up Policemen were highly respected and trusted individuals. Many times I would infer an officer of a situation before it occurred, or tell them who committed a crime without ever having been there. They always showed an acceptance when I said I had this gift from God. But now things are much different I don't tell the police anything because I don't want to be a suspect.

But I do remember many happy times my younger days. I have friends or cops, investigators, and even judges. They all seem to be just regular everyday people with a job they all felt they had a purpose, to help better mankind. So back then I didn't mind helping those people to get their job done and achieve that satisfaction they were wanting.

In the late 1960s and early 1970s, when I informed police officer of things that I knew, they would usually think very sincerely. But by the 80s they began to question me as to how I knew this. Somebody treat me as a suspect for having too much knowledge. It was during this period of time I decided not to share my knowledge with authority. I knew the mentality and morality of these people in power and changed but I didn't know how. I've met a few really good please send then but not many. I was raised to believe that if you showed respect they would return it. This is no longer the case

Chapter two; Touring this Great America?:

First I need to explain how I got Colorado and why. In 1994 I completed my first edition of my autobiography and I was looking for someone to proofread it was a spiritual person. In a linear line mandating mentioned she had a friend named Molly. A few days later he called on said Molly was in town. At the time I had just moved to Salt Lake City Utah. I agreed to meet with Molly and pay her $50 to read my book.

Molly was disabled and had undergone many surgeries on her back and shoulders. When I got to the parking lot where I was to meet her beside her daughter's apartment she came out with two canes and braces on both arms. She was unable to lift either leg more than about 1 to 2 inches. I had to pick her up just to put her in my van as she was unable to get into the van it was too high.

That night Molly read most amount of biography before bedtime. She had tremendous difficulty even turning the pages. With this I went over to her and took off both braces and I took her canes

and I put the braces and canes on the couch on the other side of the room I asked if you believe in God he said yes. I held her arms at the wrist and I told her my morning she would never need the braces canes again. I then proceeded to explain that it's a six bedroom home I lived in she could pick any bedroom but mine. I went to bed and locked myself in my bedroom like I always do. The next morning I was up at six having a cup of coffee when Molly came down the hallway while hands are over her head in her hands are opening and closing like she had no pain.

She looked down at her feet and raise each one up one time to the bottom of her feet was almost level to where her knees should be. She looked over at me and wanted to know how on earth I did that. I explained to her I didn't. It was her face that allowed her conscious mind to tell her subconscious mind that she was fine and she believed it. After she poured herself a cup of coffee we sat together for about 20 minutes, then she asked me where the nearest bus stop was. And I told her I would give her a ride.

She told me that she didn't know how long it was going to take but she had to go to a doctor's appointment since a rescheduling another surgery to remove more nerves from her body so she wouldn't feel pain. I asked her if she felt anything she quickly responded no. At that time I handed her the keys to the car which included all my other keys to my shop at home along with $20 told her she got hungry on the way gets on the I told the car was fully gas.

She took the keys and the money and looked it may, and asked why on earth I would and the keys and money to a total stranger when I don't even know her last name. I smiled and said you read the book that tells you I am don't you think I can find you if I wanted to?Before leaving to put the braces back on and carried the canes out to the van and put them in the passenger seat.

She finally got back to the house around six that evening in a panic. She was afraid I might call the police to report my van stolen since it'd taken her all day to see the doctor. I explained to her I was not worried about the man I was more worried about her and her well-being and the thought never crossed my mind. Since she didn't have any close weather I took her down to Walmart and bought her some close and finishes together through for a few days until we get back home. We were not a part again for more than one day the next 10 years I believe her exact words were after reading your autobiography I need to see if you really are that person.

I have never wanted to be quote the businessman since I am an inventor, I want to invent. And living in Utah which is predominantly Mormon I decided to hire couple of Mormon businessmen to run a company. Big mistake. They stole hundreds of thousands of dollars from investors, and made it look like I did it. Even though my name was never on any of those contracts they always tried to blame me.

I was not aware of their theft until after I went on a three-year tour of the United States. But just before going on this tour I found out that the company we had hired to do a lot of our research and development and installation of our technology on vehicles and generators and rip me off or an additional hundred thousand dollars by taking cash were tools and equipment, which they did not purchase. They were more interested in growing marijuana and having cold eggs of beer in the refrigerator, so they stole equipment and turns me for it.

The term America and many highs and lows. I remember as a child traveling from Michigan to Texas. We started out heading towards Florida went to the great Smokies then headed west and ended up in Tucson Arizona. I was only five years old. The backend everything seemed to be so beautiful the skies for clean seamlessly see forever. But as we drove on our tour to some the same areas clouds smog was horrible and everywhere seem to be homeless people.

I also remembered many happy times as a child missing a lot of flags, of people showing their pride in their country. I don't see that kind of pride in our country anymore and it saddens me. What happened to that old America? Is this country change that much?

Again they tried to make it look like I was a bad guy but then again I'm not Mormon of course I'm the bad guy in Utah. Molly and I toured 45 states biting some 85,000 miles with a geek powered suburban. We stopped in every city we could. There were many times where we felt very honored to be in their city or at their church but other times we realized it was time to get out of town before they trumped up they charge is to have us arrested.

It's really funny when you have an invention like GEET. So many people want to claim they invented it and will swear it doesn't work as long as it's in my control. If the GEET did not work then why do so many people want to own it? The answer is very simple. GREED.

It is and always greed, sometimes it is ego or stupidity. Many scientists and engineers and made claims that he does not work. Sometimes it's because they just don't understand it. And other people simply do not want it to exist and will refuse to accept it.

My med 1999 we were tired of traveling. We went back to Utah and found a home) shop was so we can continue promoting the GEET. We had fired the geek management team during our trip we found out they were stealing investor money. We have fun another young man and his wife to run the company and show us that he was capable of doing what we wanted. In July 1999 I received a call asking if the Prince of Kuwait may visit regarding the GEET? Of course I said yes.

Prior to the Prince showing up I prepared new plans to be posted on the Internet. I knew that I would lose the $75 for every small set of plans that would amount to over $50,000 a year. But I needed to preserve the technology and make sure it got out to all of mankind. So the gift was made, with stipulation. This technology was for personal use only and limited to one application per person. Not to be used for any commercial gain or commercial application.

Once the prince arrived, I knew my gut feeling was right. He wanted to purchase all rights to GEET, and as I never work with any fuel or engine again. He asked me if 3 billion would be enough to cover the cost. I smiled and told him I could not sell it, since I already gave it to mankind. He looked a little upset and very confused. I went on to explain that the model I gave away on the Internet would probably only give a person a 30% increase in mileage. I told him that the real plans were not to be released until such time as I release the real water plans.

He asked me what the water plans were, wanting to know we were pulling water out of the air. I explained to him that every car truck furnace and boiler on the planet could run on pure water or

even saltwater. And those plans will be given away as a gift if anything ever happens to me or my family or my dealers again. With this stood up and asked that we all are head while we pray to Allah. He prayed that we may all live together as brothers for a long long time. He also said that that was the best insurance policy you never heard.

Before he returned to Kuwait he went by my shop where he met some of the employees and the other management running the company. After he left there by employees called me up one after another wanting to know if I lost my mind. They explained to me that if I simply took a $3 billion I can give each one of them a $10 million gift and still be rich and none of them would ever have to work again. This was the worst turning point of employees and friendships I had ever thought possible.

To the end of the year everything I tried to do was being sabotaged by management and employees. They did everything within their power to cause GEET to go bankrupt. I do not know the full extent of the theft, and I may never. When I tried to get police involvement in Utah, the police and sheriff would not even come to my office or home to take a report.

3 January 2000, I knew I had to close the existing GEET company and fire all the management, or we might be forced into bankruptcy. I found a gentleman named Terrill Dalton and asked if he still wanted to get full set of plans. He responded yes. I asked him if he could get me a computer, and teach me how to use it as an exchange for those plans and he agreed

. He came to my home in South Salt Lake the next day and building a computer. He then install all programs I would need to be able to run the company from my home. We worked until about 3 AM so that I would know how to check my mail and respond accordingly. When I found my office and asked them for my passwords so that I can respond to email they refused to give them to me and told me they were handling all correspondence. Mr. Dalton found a way for me to get copies of all emails ever going to the gate website so I would get copies of all emails addressed to the company

. Over the course of the next 10 days I receive emails proving that the management of GEET was setting up a new company about 30 miles south called HEET. This information was rather heartbreaking. It seemed the management failed to tell me that they contacted many dealers from around the world in early December and told them that Paul Pantone and Geet where it already to file bankruptcy, and they should withhold any future payments or their money would be lost

. They went on to explain those millions of dollars could be redirected, to their new company by the end of January. In my sent box when I checked it I found out that most of the people I had Artie fired over the last six years were still working for the company and this was withheld for me. Even an attorney, who I was paying was really working for their new company HEET.

Mr. Dalton introduced me to an investor friend of his name John McBride. Mr. McBride, his wife and their son came to my home during the second week of January. After viewing the engine running he said he be more than happy to put up the money to get the company going again. Mr. McBride brought me a personal check to cover my immediate needs and said if I had

a proper corporation with proper management he advanced the rest of the funds needed to get gate going full speed.

The following day Mr. Dalton brought over another friend who is an attorney, and he claimed that he was there to help Mr. Dalton and I get the company on the right track. This attorney, Scott Steinblick, was also a Mormon like the rest of the people working for GEET. The first thing they wanted to do was to form the new GEET Corporation.

On January 15, 2000 I went to the office and gave management. I phoned the Salt Lake Police Department prior to my arrival at gate management. I also cut my hair the day before. When I walked into the office, wearing all black, even a ty, no one recognized me. The office manager and his wife were the first two I saw and handed a list of criminal issues they would need to address when the police got there.

As I was explaining this, the company attorney, Robert Dodenbier came out of his office, and I served him as well. I told Robert to bring the other employees in from the shop and he did so. Once I have everyone's served, I open the front door up is that if any of them did I want to talk to the share or place they should leave and leave immediately. They all claimed they wanted to get their computers and paperwork, and I informed them that nothing was going to leave my building without being searched first

. They all ran from the building got their cars and left. Our new financial backer John, was very upset that any of them got a chance to leave as he thought they should all be prosecuted. I told John that after spending more than seven years in Utah I didn't take any charges would ever be filed against anyone who is Mormon unless it was for murder. He made it clear he was not a Mormon but very rich and he felt he could have them all thrown in prison

.I removed all contents of computers and papers from the office and took him to my home. It took days to go through everything and what I found was almost unbelievable. While the management was building generators to ship to customers they were filling out fake shipping reports on UPS forms for customers I was aware of who never got there generators since they were never shipped. I also found a receipt book for the same number of generators sold to people who payed the bills by credit card of the employees

.On the attorneys desk there were files for many people, who had hired him to file bankruptcy's divorces and other legal issues. With the four months he stole money from our company I found out later he wasn't even a licensed attorney.

On management desks the new brochures new company HEET. If these thieves worked this hard for GEET it would have been very successful. All of these people felt justified because I had turned down the $3 billion to screw mankind out of this technology.

Two weeks later I held my own show in Colorado Springs, complete with over 500 exhaust pipes, and about 20 intake butterfly assemblies for V-8 engines. I've been with my wife for six weeks but I showed her the company did not go belly up. I also introduced her at that time to Terrill and Scott who were now want to be heading up the new company of GEET Corporation.

I told Molly to find the house she wanted while I began packing in Utah for the move. We ended up moving into a beautiful two-story log cabin in Victor Colorado. Molly chose this location to be close to her friend, Wendy. The property was beautiful. Three ponds, guesthouse, workshop in a three bedroom home on over 80 acres of beautiful land high up in the mountains

.I must admit I haven't done mountain living a long time. The elevation is over 10,000 feet but that didn't bother me at all, but it sure bothered all of my students. Every couple of weeks Terrell and Scott would drive up the hill from Salt Lake to visit. They were putting together the corporation stating Utah was a home base.

We were about 1 Hour drive from Colorado Springs and only shopped one or two times a week. Most of the time I had students around your employees so I would let Molly take Wendy on her shopping sprees. They became very close to each other uncomfortably close. Every few days Wendy would bring Molly fresh water from a local spring. I normally drink tap water from a well seem to taste lying to me. In May Molly had to go in for an MRI, and send shoes very claustrophobic they insisted that if you come early that they can give her a shot that would calm her down. We arrived at the hospital in Colorado Springs midday and they are her ready for the MRI. About 45 minutes before the MRI was scheduled they gave her two injections of a drug called verse set VER SET T. Then is it trying to take her in to the MRI they realize that she was not going to cooperate and needed another injection

.The doctor approved a second shot. Another 30 minutes went by and there was a shift change. It was during this time that the nurse came over to Molly and put a fresh page on top of her chart. The doctor came by only now it's a different doctor and ordered that he be given another shot of VERSETT. When I questioned the doctor as how much VERSETT were they going to give her, he assured me that they give this procedure all the time and Versett is very harmless.another 30 minutes went by and still Molly was agitated. Again the doctor was called and a fourth dose of VERSETT was administered. Now she and 26 units of VERSETT and they took her back in to the MRI machine. I stayed out in the hallway watching as Molly through people across the room when they tried to put her in the MRI machine

.I was astonished to see Molly at 95 pounds throwing guys big enough to be playing for the Denver Broncos front line across the room and bouncing off the walls. It took six people to hold her down to the gurney while he strapped her down to the gurney and removed her from the MRI area. When the doctor came into the area to find out what had happened he realized the doctor on the earlier shift had already given her 13 units of VERSETT. The other nurses in the hallway and was trying to put blame on them there overdosing.

Molly did not want to be alone with doctors or nurses in the room and wanted me there so they made an exception and allowed me to come back into the room quickly Once the doctor saw Molly calm down completely in my presence he wanted to have her released to my custody. Molly really wanted this is that you want to get the hell out of that hospital so I did agree and I signed her out of the hospital.

I began driving back home and Molly said she would much rather just stay in a hotel that night since we didn't have to be home for any important business. After which hotels want to go to and

she said that Sheridan she liked it so we drove into Colorado Springs to Sharon in objective I pulled up to the front door and help Molly to the room along with an overnight bag that I went back out to park. I returned about five minutes later Molly was not around. I started looking for Molly outside in the restaurant and ended up in the lounge. Since I can find her anywhere I asked if somebody would check the women's restroom and she wasn't there either. On my third visit to the lounge the bartender motioned that she was hiding behind a wall. So as I walked across the lounge I found one share in behind the wall that you could not see from the door and Molly had one shot of whiskey sitting in front of her

.Molly said let's just have one shot together and go to bed. I agree and I have some bartender to bring each one of us a shot the bartender immediately trying to bring it to my attention said do you want double shots like she has been drinking or do you want a single. I said make it a single. After one shot Molly and I went back to our room and she picked up the phone and called her sister Patty. About 10 minutes into the call she passed out asleep and I said you might've 'atty and I hung up. About 15 to 20 minutes later she woke up and want a beer. Knowing I could walk across the parking lot and get a sixpack for what it would cost to have a beer from the bar delivered to the room I walked over to the store next door

.When I returned I handed Molly and beer and a couple of scratch off lottery tickets. Both tickets I handed her were winners. She then said she wanted to call her sister Patty and talk to her. She said she had talked to her sister for a few days. I then told her she just talked to her sister about an hour ago and she said she had not and didn't know I was lying to her.I assured her that she had to talk to Patty and she needed to get some sleep. He walked around the bed with just her panties on, grabbed the phone and swung it. It cut my cheek and eyebrow.

There are caddies on she ran out the door screaming at the top of her lungs, "Help! I;m being RAPED!!!" when I got up from the floor with blood running down my face I ran to the hallway. As I am in the hallway I could see Wendy at the far end of the hallway almost an hour from home grabbing Molly and running out the door. But at that point there were about 20 men in the hallway ready to beat the living daylights out of me.

I went back into my room and in my briefcase got out a couple of magazines showing that Molly and I were not only married but we got married on stage at a science conference and we were the back cover. I then phoned the front desk and asked for security. When there was a knock at the door and they said security I open the door, only to have the security man and two police officers pounce on me and handcuffed me a rape. I was arrested and hauled in jail for the night. One of my employees was a retired Sheriff's officer and he came to get me out in morning. He said Molly was really concerned about what happened wanted me to continue running my school at the ranch and she was going to take a few days off at Wendy's house.

A few days later Molly phoned and asked if she could come home. I said as long as she was drugged up of course she could. At that time is not aware of and Wendy had for me. I was not aware that she was working with Terrill and Scott, in an effort to take over GEET.

By June Molly was becoming more and more agitated with me. He wanted to get her hair cut real short and I prefer with long hair and express my feelings. I couldn't put my finger on what it

was but several times Molly would just explode for no reason at all. So maybe sit around by the fire watch a little television have a drink or two and before movie was over she be yelling they didn't do something right I was taking long needed more help that I was giving them. I didn't know what setting her off but I put up with it.

One evening I went to bed a little early 9 o'clock. The master bedroom was upstairs later I heard her screaming downstairs that I didn't love her anymore. I came out to the little balcony overlooking the living room to ask her what the problem was this time. She started looking things up the kitchen counter the pillows off the couch and continue screaming that was when she told me you wanted to get her hair all cut off so that she looked cute and wanted to diet bright red. She also told me that if I didn't cooperate whether she was moving in with Wendy and her husband

.She grabbed a knife on the kitchen drawer went into the office and stand the wall about 100 times. When I saw her grab the phone I assumed she was going to call Wendy so I quickly connected the phone line to the fax line so she couldn't dial out and I went to bed. A few minutes later she was yelling that he wanted keys to my suburban since I was blocking her Cadillac in. Again I got out of bed went to the little balcony and drop the keys to my suburban on the counter in the kitchen and went back to bed. On the way back into the bedroom I told her she got caught behind the wheel to be spending a few nights in jail for DUI. She went out the front door screaming FU.

I heard the car start and she drove up to the guesthouse on our property where we had several students spending the night. I went back to bed. I woke up a little later naked to my room being filled with red and blue flashing lights. I came down to open the door to find out what had happened thinking that maybe Molly had had an accident or just passout somewhere. As I unlocked the door the police the door knocking me across the entire living room and I slid on my back into the kitchen all the way to the cabinets old it was a hard.

Luckily when I saw all the blue lights flashing in my living room I was smart enough to turn on my tape recorder because I learned the cops lie. After laying on the floor perfumes minutes I was helped to the couch by two officers there were already many other police officers in my home searching for Molly. Once I figured out what they were looking for, I told them Molly had driven up to the guesthouse.

I then asked him to please leave my home, they refused. The officer in charge told me that in Colorado when they're called one or more people will go to jail. They went up the driveway and Molly saw the lights and ran out the back door and into the woods. I thank God that there were four people in the guesthouse that all said she was drunk and made no sense.

About 15 minutes later the officers returned with Molly. She has scratches on her legs from where she ran through the underbrush trying to escape the police officers. Once the officers radio they had Molly in custody, I was handcuffed and taken out to the back of an ambulance. One of the officers had gone back into the house and said he saw were Molly had stabbed the wall repeatedly.

At that point the officer in charge said one of us would be going to jail it was up to me. I truly felt that even if I were detained for being under the influence in my own bed while sleeping, I would be released by morning. So I said let me make but they do not have the legal right to come into my home nor make an arrest. The officer in charge said it was a doctors arrest and I would be taken to the hospital first for an examination. I was transported by ambulance to the hospital in Colorado Springs. They left me handcuffed to a gurney for about six hours. Then I was transported to Teller County jail where they charge me with spousal abuse.

I thought the bail bondsman and told him who I was. After checking out my website he came down to the jail to bail me out immediately. The bail bondsman also drove me back to my home, and told me I had to stay away from Molly by 500 feet until after the hearing. Molly phoned me within minutes of getting out of jail to tell me that she was not at the ranch and she was staying with Wendy. She did this so I can continue my classes at the ranch the next day.

The next morning when I woke up I found I had a flat tire in my suburban. I walked up to the guesthouse to tell my students that I would be going to court at 10 o'clock and would be back by noon to continue classes. I return to my house my maintenance man came by the house to see how I was doing and I asked him to change the front tire. He told me I did not need to be changed it just needed to be aired up. But he also told me that one of my spark plug wires going to the coil was missing so he would go up to my shop and see if he can find something that will work. I grab a shower and put on a suit and was getting ready to run out the door to go to court when the phone rang. It was Wendy.

Patient and don't know when my maintenance man put on the wire that he said he found in the shop but it matched the set of wires already on the car, and his conveniently knowing that the air can be let out of the tires. But then when I signed calling Wendy to tell Wendy that I would be leaving the ranch soon I can hear out why he was reporting anything to her.

Wendy asked if the ranch was okay? And of course it was so I said yes. Then a male voice spoke up during the Pantone you are under arrest stay where you're at. I said I don't know who this is what I'm heading to the courthouse right now and I do not want to be late for my hearing if you really need to see me I'll see you there and I hung up.

I parked behind the courthouse and ran up the stairs only to find officers waiting for me at the courtroom door. They followed me into the courtroom where the judge was waiting. The judge seemed very upset with me and said he would hear all the cases together. He told the officer to go ahead and make the arrest and remove me from his courtroom, and I was being handcuffed I explained that this was a terrible mistake. The judge stopped before he left the courtroom at his door and turned around and looked at me and then asked what do you mean a mistake. I told him that I had not had any domestic violence or spousal abuse I was placed under a doctor's arrest and I had a tape recording that would prove it sitting on my coffee table

. The judge told the sheriff to go by my house and get that tape recorder and bring it into him. The sheriff went by my home got a tape recorder and I was hauled to jail. The officer then called the judge and said there was no tape recorder. Again I had to call for bail bond. I told the bail

bondsman again what happened. The bail bondsman said he truly believe they do things like this to people who are not from Teller County.

This time I had to try call because the bail bondsman had to go to another meeting. Instead of going home I went to an apartment in Victor. I checked into a room and I called my son Jason. He said he had received a call from someone claiming to be Molly and it did not sound like her. But she just kept telling him this outrageous story on how I was trying to kill her. None of her story made any sense.

I then phoned the Victor place and asked to speak to a detective I told them what happened. Two detectives sat in my living room of my room were about two hours listening to the details and events that occurred for the last three days. Then there was a knock at the door. It was another officer. She was here to take into custody for threatening to kill my wife. I asked when did I make such a threat. She said about one hour ago by telephone. I pointed over to the two detectives that I just spent over two hours with and she said that I must've had someone else make the call so I would have an alibi.

My blood pressure was skyhigh and I blacked out. I would never threaten to hurt Molly in any way. I still do not have a clue as to who or why I was being arrested, at that point. And again I was transported to the hospital and thankfully they took me by and set of air. I told them I was terrified of the thought being transported by helicopter so they had to cancel the helicopter before it arrived. After a night in the hospital I was again transported to jail. Only this time I sat in the front seat in the arresting officer new knew for a fact that I do love my wife and I would never have threatened Her. She told me that in Colorado, on the fifth arrest, it is an automatic 20 years or more in prison for violating a restraining order.

She told me that whoever was making this false call could do it one more time and I would be put away probably for the rest of my life. Again I called the bail bondsman. This time he was a little reluctant. But after bailing me out he gave me a lecture and took me to a different hotel often cripple Creek only one block from the courthouse. He told me that if I was arrested again there would be no mail but mandatory jail time.

Once I was dropped off I went immediately to the courthouse and explain to the judge that I have never threatened my wife. I told him how much I love Molly. He went back into chambers and check the Internet, then came back to the courtroom. He said he believed the person responsible would probably do it again very soon, so he sent the bailiff with me back to my hotel room.

The bailiff inspected my hotel room, he and remove the telephone and wire so I could not use my computer. I left the door open so from his private car he could see into my room. After about an hour he wanted to get a drink and went to lobby to get a cold soda out of a soda machine. He returned about three minutes later to find two Sheriff's officers dragging me out of my room. He asked what the charges were and he was informed that I just phoned and threatened my wife in the last 30 minutes. I was taken to the cripple Creek Jail to await transportation to the county jail.

This time while I was in jail Scott called from Utah and they allowed me to take the call. He told me to go right back to the ranch and sign the papers that he had just faxed to me and leave them

on the kitchen counter and He would come get me out of Colorado and back to a safe area. I knew then that He was the involved in having me arrested and was trying to do it a 5th time. I would never get out. He said Molly had lost her mind and Wendy had a Power of Attorney to handle all business.

. Only this time about 10 minutes later he came back to my cell and opened the door and said I was being released to the judge. This time the judge knew for a fact that I had not made any such call. He said he would make a few phone calls to the sheriff and other agencies to make sure I would not be re-arrested. The judge also ordered that in his courtroom next morning at 9 AM. A few minutes after 9 Molly arrived with her friend Wendy. Molly had cut her hair very short and it was bright red. And she acted stoned.

As the judge began speaking Molly interrupted and said she wanted a permanent restraining order against me. The judge asked Molly if you love me and she responded that I was mean and I would matter cut her hair dye her hair or have her best friend Wendy.s. After this outburst the judge looked at me smiled. He said it is not legal for any judging you in Colorado to issue a permanent restraining order under these circumstances. The judge asked me if I would give my word that I would never contact Molly again unless she made contact first.

He then ordered that under those conditions there is such a restraining order in place, unless Molly asked for it to be removed, and writing, and with witnesses, and this order would be dismissed. As his gavel hit the bench we all stood up to leave. As I stood up the judge ordered me to sit back down. He ordered Molly and Wendy to leave the courtroom. The best available to close the door, then the judge said if I had any place on earth to go outside of Colorado I should leave now. you will be 3BE could be as sick as always ina and the **phone as long as will be will**

The judge and is ina seat in the weeks is one where you will very concerned that Molly did not seem to the right state of mind

Will I went outside, got in my suburban and drove to Utah, stopping only to use the bathroom and a buy gas. I stayed at the quality and in Salt Lake City for a few weeks to get reorganized so that I could give another show of GEET Technology. Tesla conference when she is the July coming up at the end of July was a fast way to get back on my feet back to my feet since I left everything in Colorado. And will now began start over from having only the knowledge in my mind. That weekend I pulled in over $400,000 dollars in season prepaid fees.

And I was able to start over, with enough money for all new equipment. The space I rented was on State Street in Salt Lake City. When I return from Arizona I was surprised to find out that the location I had chosen was not being used for the school location. I hired man name Del Christiansen to run the school in my absence. Del had rented a different building that was much larger than the one I had selected.and it didn't dawn on me at the time that he eliminated my name from the lease.

In August and September I spent about $250,000 preparing the new 15,000 ft.² shot in classrooms so that we were able to manufacture and teach everything about GEET. During July and August I was also depositing $750 a week in my wife's bank account so she would be able

to live comfortably while she decided if you wanted to come back to be married or live on her own. In mid-September I received a call in the afternoon from Molly saying she just found out that I've been giving her 750 week last seven weeks. Since I had a court order saying I cannot make contact whether the court order did not include line giving her money as a gift. She called to tell me she wanted to come home immediately if I would still have her. I had my secretary into office people witnessed first statement and sign an affidavit which was emailed immediately to the judge

.Molly showed up about six hours later at the hotel where I was staying. When she came into the room she collapsed in my arms. For two days she did not get out of bed. At first I thought she was just tired, but every time she would drink water she would have horrible stomach cramps pain and unable to walk. I have strong reason to believe that she had some kind of poison in her body that was reacting to the water causing all of her discomforts. I found the University of Utah Medical Center and asked if they had anyone there that had knowledge and poisonings

.I was informed that one of the top professors at the University was giving a lecture that very day on how to detect poison in patients. I told them I would be bringing Molly and shortly to the ER and I would need to see this doctor as soon as possible. Upon arrival at the hospital I notified them it was my understanding and belief that my wife had been poisoned and I did not know what kind of poison may have been used. I also requested that my wife together and a test model for urine said she had to go to the bathroom and we needed to get the urine tested for poison. I was informed by the ER doctor that I was not proper procedure and without a doctor's order they would not test for urine..

When the specialist finally arrived he asked me to leave the treatment room while he examined my wife. 15 minutes later he came out of the exam room to inform a me in his opinion Molly had a mental disorder. When I asked him why he felt that way explains in a that she seemed delusional. He said that she had told him the reason she left Colorado to come home to me was somehow the spring water that Wendy was bringing her killed all of her plants. And Molly thought someone might be trying to kill her. This doctor referred Molly to a clinical psychologist for all mental evaluation

. It took me several weeks to find a laboratory that was able to analyze air and fingernail clippings. The laboratory said they only work with doctors or legal authorities like the police or FBI. They also told me the test would be about $3500. It took a few days but I found a doctor that would take those samples and send them off to the national medical services for testing

. When the results came in it was clear that Molly had been in fact poisoned. When I tried to report this to the local authorities in Salt Lake City they said it had to be reported back in Colorado where she was poisoned. Molly did not want to return to the town she had been poisoned not knowing who all was involved in poisoning her. When she first returned she knew that her water had in fact been poisoned.

But prior to going to the hospital Molly had called her mom and dad and other family members to tell them that she was safe and back home with me. It was at this time that her sister Patty told her that I had called while she was still in Colorado to warn her that they might try to kill her

because our best friends were trying to take over GEET. It seems as though Wendy and her husband and become close friends with Terrill and Scott. And they came up with a plan to get Paul Pantone thrown in prison for 20 years or more. I also received a call from a young girl wanted to remain anonymous

.She told me that three men arrived in town and were at a party She told me the three men arrived party she then said she became friendly with one of these three men to find out who exactly they were talking about.it took several hours of listening before she realized what was ever talking about at that point she wasn't sure whether the call please call me. She said she called please and told them what she had overheard and they do not believe it.

She then phoned me and told me the plan. Quite simple as it was. All three men were positioned on the street outside of her apartment. One of the man sat in front of the bar across the street and watch the only entrance to her apartment to make sure she did not escape and was to arrive there at about 8 PM. A second one was waiting in an older beat up car lot the other direction from her front door. And the third one driving a white suburban identical to mine was parked in an alley two blocks away.

She told me the white suburban within my front license plate from my suburban billing Utah registration on the back bumper with a face sticker. And when I checked my suburban the front license plate was missing. He said it 2 AM the white suburban would be part in front of her apartment door.

At 10 o'clock one of them was supposed to call me to make sure I would be in court at 9 AM in the same town where Molly was or a warrant for my arrest would be issued. Since I would get the call after 5:00 PM there would be no way to verify my need to be in court. The plan was Molly's best friend Wendy, who drives disabled children to school in the school bus was to drive my Molly's apartment at 715 in the morning. Then when seeing the door to her apartment opened at that hour she was to stop the bus get off the bus and go running in the Molly's apartment to find her beat to death at which time he would come running out of my wife's apartment covered in blood in front of all of these mentally challenged children screaming.

Shortly after discovering her body the witness was sitting in front of the bar was to walk up and talk to one of the officers and informed him that he saw a white suburban with Utah plates that look real suspicious sitting in front of her apartment the night before and claiming to be a good Samaritan even wrote down my license number. This would be all they would need to put me away for life. But for some reason, only God knows that was the day that Molly drove to the store and check your credit card to see if she had enough money to put gas in her vehicle only to find that she had thousands of dollars in her account that I put there.

Molly bought some freshwater at the store and filled up her van. After drinking about a half a gallon of water you went back to her apartment and realize all of her plants were dead or dying and she knew something was wrong. She grabs me close in her laptop and ran out of her apartment and drove away. She had escaped dying by only a few hours. When she looked in her rearview mirror she was leaving cripple Creek she saw that older vehicle with two minute following her and she was grateful that she had just filled up her van.

She did not stop until she got into Utah for gas knowing that she had lost her tail about 100 miles back.

Everything was so well-planned except Molly realizing he was being poisoned and escaping. The next day she called Wendy to tell Wendy she left and in the background Wendy's husband said I hope she doesn't find out what we've done.

The poison that was found in Molly's body was from drums of poison that were stored at Wendy's house why her husband. There are many other details about this attempted murder that are not included at this time so they can be used later in court.

Once Molly back with me recovering from being poisoned we moved into a nice house. A few weeks later I had to return to Colorado to face the charges of domestic violence that never occurred. And Molly was beside me. My attorney time set by just guilty to one charge of everything else would be dropped and I can go home, otherwise I would have to come up with an additional $10,000 to fight the case and it would probably take many months if not years to get the case settled. I asked him what the fine or penalty might be and he told me two years probation but I can leave the court right now and the whole thing would be behind us

. I took the plea bargain and was ordered by the judge to go to the local probation office and sign up. When I arrived at the probation office I was informed that for the next two years I was not allowed to go home to Utah I had to stay in Colorado. With that I stood up and said bullshit I am going home today. The probation officer informed me that if I tried to leave Colorado I could face up to 20 years in prison.

I left the probation office and drove right straight back to the courthouse I arrived 4:55. I entered the courtroom just as the judge was getting ready to leave for the day and said I want to withdraw my plea. The judge asked why and I told him that I have a business in a school to run in Utah and the probation department said I could not leave Colorado for two years. And I did not choose to be a prisoner in the state of Colorado for two years

The judge ordered me to be back in court at 9 AM and had his clerk immediately call the district attorney and my attorney and schedule a hearing for the following morning at 9 AM my attorney couldn't make it . The district attorney agreed that there was no reason for me to stay in Colorado so the judge modified his order allowing me to go home to Utah and serve out my two-year probation in Utah. My attorney did not know of this change in court order

.When I returned that day to my office and walked in the door Dell and all of my employees look like they were shot to see me at my own school. Dell said I'd better get back to Colorado quickly or I could get 20 years to life for leaving Colorado against my probation. I asked him how on earth he knew about that and he said that's what my attorney had called and told him was my sentence.

The following Monday I came to work as I always did in the door was locked. When I tried to unlock it with my key it did not work. When you heard the door he came to the door quickly and asked what the hell I was doing is trying to get into my building. He smiled and said it's not your

building it's mine and everything in here is mine and if you don't leave I will have you arrested. With this culture and immediately came out. Since he had the least putting his name and my name was not on the lease I was told I had no legal right on is school property and that this was a civil matter. I was also informed that if I came back to my school I would be arrested for trespassing.

Christmas was rapidly approaching and everything I had was in that building behind locked doors. About two weeks before Christmas I received a call from the Hess generator company in Carson City Nevada and they wanted to know if I was the inventor of GEET. I told the man I was and asked him if he was interested in using for becoming a licensed dealer. He said he already had an agreement with the real owner of the technology Dell and his four partners.I asked for his address until the money right down.

Before I could arrive in Carson City Nevada test oil company had rented me a room and one local casino hotels. When I arrived at Hess motors I was given my keys to my room and told there would be a meeting the following morning in their shop to go over the events that occurred. The next morning management met with bank and explain the Dell cut them a contract deal for a quarter of $1 million down they were going to have first option to use all of my technology that they claim they invented. I went out to my wife's Cadillac and showed them the demo engine and they laughed and said they'd already seen one just like it when Del and his partners brought it in that's why they offered the deal. They also told me how stupid Dell was that he let the engine with them overnight so they could take it apart and analyzed how and why it worked

.The ironic part of this Dell did not have the money to pay the rent the building nor the ability to make a gain engine run right yet he still thought he could steal the technology by simply changing the locks and claiming he was the inventor. It took a few days before Dell finally realized that that money wasn't going to be put in his account at which time he called me and asked me to sign the technology over to him or else and of course I said no. I did not know the time the Dell was working in partnership with Scott and Terrill.

Best before being locked out of my building and appear in court in Colorado, Scott came by my office and assigned the corporation over to Dell and his daughter-in-law but insisted he be given 10,000 shares of his own stock in the Corporation. Just to get Scott and Cheryl out of my hair I agreed to it since Scott is an attorney I thought all documents were legal. About a week later I received the checking account records and checkbook from the Corporation made out from Wells Fargo Bank.

When I went to the Wells Fargo and ask for records going back to the data Corporation was established they were a little reluctant but they did give me a copy. At that point I realized that the bank and open the Corporation account two months before there was a corporation because the Corporation attorney and requested it. The last check that Scott wrote was for an E*TRADE to write that gave John McBride back his money that was offshore?

It appeared to me that you that point had no investment or involvement in the again since he had been given back all of his money. Years later he would file a claim with the Atty. Gen.'s office

alleging that he owned all of GEET for the short-term loan. You also claimed that I illegally issued stock in my corporation that I never owned.

In January 2001 I found legal action in federal court against Bill Christiansen and all of his accomplices. They stolen all my equipment pictures and research and never would tell me or the court where they take it all to. After this case gone for six months my attorney on may and demanded an additional eight to $10,000 to be paid that day or he would not be representing me in court on the following Monday. My balance due at that time was only $1200. What I found him to explain to him that I did not have it I needed my documents back so I could respond by Monday and he told me he would not give me my documents back

.Instead that attorney filed a legal action against me for nonpayment of fees and failed to have me served so I could not appear in court. Shortly thereafter the same crooked attorney went back in front of the same judge and filed a lien fraudulently against my US patent? Several attempts were made to the bar association but I was told that I have to pay the attorney before they would consider any action.

Again it was a case where everyone trying to steal a gate claimed it didn't work but they all wanted to own it. In about April 2001 I reopen my school and West Valley city Utah. About 25% of my students help PhD's. While the school was open I received a call one day from Mr. Olson. During the call we got disconnected. I redial the last number that is owned in and it was answered attorney general's office and I asked for Mr. Olson. I asked him how I could help Him. And he informed me that he would take all the money it would take to find a way to put me in prison for life. I asked him what the problem was in the only answer I could get was you know

.Well I didn't know and I still do not know why. A few months later my wife was poisoned again. That night I going to bed and Molly was watching television downstairs in the living room. Morning when I woke up she was on in bed I came downstairs to see what she was and I found her on the couch having convulsions of some kind with her eyes rolled back in her head. I dialed 911 and said my wife seems to be in a coma I think she may have been poisoned again send an ambulance I was told to stay online until officers and an ambulance came.

Once arrived they immediately went to check on Molly and they call the local hospital to tell them what her condition was her blood pressure was low and then it would go sky high and that would drop again rapidly they did not have a clue. While the attendants were taking care of Molly several police officers came into the house and asked for my ID and wanted to know what happened. I was being quizzed very hard backup of the officers while the third one was phoning in my ID. About a minute later the officer came back into the room handed me my drivers license and told the other two officers it's time to leave

.I pointed out that the back door was ajar and maybe fingerprints on the door handle there was also a pair of glasses prescription glasses that look like they belonged to one of Dell Christiansen's key people. The officer who just handed me back my drivers license went over to the door and rubbed off any fingerprints from both sides of the door handle picked up the glasses put them in his pocket needs and we don't have any evidence fiercer so we're knocking to stick around you have a nice day. When I asked about getting a report he turned around Torah paid off

of his report she had said here make out your own report and send it to us have a nice day. I again said my wife was poisoned and the officer smiled and said have a nice day and walked out.

One of the EMTs told me he was taking my wife to Cottonwood Hospital and I can meet her there. I like the house up and go straight to the hospital. After waiting around for about an hour they finally let me go in to see my wife and she was still in a coma and hooked up to an IV. The doctor came in and said he had no idea what happened but it look like she may have had a stroke or a serious heart attack and there was nothing they can do I told him I needed to run home because I believe the same poison to poison her before may have been readmitted into her body

.I returned about an hour later and I handed him the report from the national medical services Pennsylvania and I asked the doctor to please call there and find out how to treat for that kind of poison. Reluctantly the doctor did call. After his call he came running back into the room and he pulled out the IV to and called for different kind of IV. He said of my suspicion was correct she should be fine in about 20 minutes. At about 30 minutes later Molly set up dizzy sore and tired. They kept at the hospital for two days under observation in her condition got better. This was all that I needed to know that it was again Wendy and her husband would make friends with the newest management team of the that adjust all the business

. These people weren't happy to stealing the business they wanted me in prison at any cost. It was at that time I decided I think it was time for a move away from Utah, and get security around me and my wife.

Before the poisoning a woman in Florida order the plans and we sent them. A few days later she complained that she had not received them, so they were resent. She again phoned and said the quality was horrible and she wanted the "real plans"? So this time I sent her a full refund with a third copy of the plans, only I had my secretary send them since I was with my wife at the hospital when the post office opened.

I WAS SERVED with a Summons to appear at the Attorney Generals office for failure to deliver plans? And this complaint was signed by Mr. Olson. Mr. Olson was trying to prosecute me for not delivering the plans within 30 days of the order I decided it was time to hire an attorney. So I appeared in this Mickey Mouse courtroom at the Atty. Gen.'s office with an attorney and my secretary.

There was a Mr. Olson in charge of the hearing acting as a quote Judge, and Mr. Olson testifying on behalf of the state. The only other witness was the woman who complained that she had not received her plans within 30 days of her mailing a check. During this hearing we were not allowed to cross examine the only Witness and the witness was interviewed by telephone. During her testimony she did say that the third set of plans included a refund check and was mailed on the 30th day.

We were informed that the court would make his decision and send us a letter within 30 days. Two weeks later I was told I was guilty of not delivering a product that was paid for within 30 days under Utah law. Even though the witness said she had received three sets of plans and a refund I was still ordered to pay the state $3000.

I filed a notice for a new hearing as directed and it was refused. Several months later I was informed by the court that I had to appear with all financial records so they could secure their $3000 judgment and I was not allowed to appeal anything. Even though I had an attorney, they said they had the right to ignore my attorney and any testimony or evidence that he may have presented, which all evidence was presented through the attorney. The criminal actions on behalf of the Atty. Gen. were just beginning.

Before we left Utah to go to Idaho our billing was broken into by someone that knew our security system. Whom ever it was shut off the cameras, and stole about $25,000 worth of equipment as well as all receipts for cash sales. And again the sheriff department refused to come out and take a report. It is almost a day to complete the list of stolen property. A few days later our landlord who lived in the other half of our building, call the police and reported a stereo stolen out of his truck

.There were five officers present, taking fingerprints, casting tire tracks and footprints, and taking written reports, but he was Mormon. I decided it was time to move and the school was relocated in Preston Idaho. An older gentleman named Kay, and told me what a great small community this was, and told me I would be accepted with open arms. And for the next year we continued living in hell because we were not Mormons

.I signed a one-year rental agreement for building and I couldn't wait to get out of Preston. It seems that most of the cops worked part-time for landlord doing odd jobs and they were all on his side. At the end of the year we gave noticeably removing in our landlord is not happy. He offered to let us use a building at no rent if we would allow him and his partner to handle marketing

. But after reviewing all of our debts and liabilities and assets, he changed his attitude. The next morning when we walked in Molly began gasping for air and ran to the door someone at put poison in the building. He went your car and said nothing not even was worth dying for she was going back to live with her family in Utah. I phoned the police and wanted to file a complaint to the poisoning in my building. The police said it was no longer a police matter that was between me and my landlord. The friend who said I should move to Preston did not believe me when I told him the police didn't, so he found the mayor and demanded a police report be made.

About two hours later a policeman showed up and with a very negative attitude than what you want me to write in the report. When I told him that somebody had come in the building and placed poison some type of aerosol he says so what. It was apparent that I would not get any satisfaction and there would never be any investigation. It was like the rest of Preston Idaho. Many times we tried to eat in restaurants with our students and we were told the restaurant wooden service. We tried to order pizzas at the local pizza place and they said I'm sorry we don't make pizzas for schools. When we first got to Preston we try to get Workmen's Compensation insurance in the state and they refuse to allow us any insurance. But they did notify the sheriff to have us arrested for operating a business without insurance. The day came to arrest me for operating the business without insurance I surprise the officer when I handed him a copy of our policy issued from a Florida company showing that we did have insurance.

During the last week we were open to the public in Preston car pulled up to gentleman it very well-dressed and they came in to see GEET operating. Once their demonstration was done I was asked to come out and greet these gentlemen as they wanted to talk about a possible venture. When I entered the shop area the one gentleman said my name is John and this is my personal assistant. I introduced myself and asked how I could help

.John smiled and said how would you like to work with the Huntsman family? Well since I do not respect some things that I believe the Huntsman family has done I was very honest and blunt and said I would much rather work was Satan himself. Both men looked at each other as if I said something horrible and asked why I felt that way. I gave him several examples one of those examples that seem to get them the hardest was I thought it was sinful that John Huntsman Junior would take publicly owned land on the University campus to build the Huntsman Cancer research Institute. But then add insult to injury the state of Utah jacked an extra two dollars a pack on the cigarettes that was going directly to this Huntsman Cancer research Institute and I consider that taxpayer money

.At that point Huntsman said I believe this meeting is over. It wouldn't be until five years later that I would find out that it was John Huntsman I was talking to that day because he signed in to my school sign in sheet as a visitor. I know it's just a coincidence that a few days later a warrant for my arrest would be issued and all charges would be dropped if I would simply sign my patent over to the Atty. Gen.'s office.

A few days later I went back to my shop only again to find the doors had new locks. This time Mr. Robert Fackrell decided that all the cops in town and all the other people in power in that town including the judges were all his friend, he knew he could get away with it. You cannot in the middle of the parking lot in hand me $100 for gas to get out of Preston Idaho and told me that he was keeping everything else in the building. What a good Mormon he is.

When I finally got the court on it's security fraud as I was being charged I found I was being sued by the Utah state Atty. Gen.'s office for items that have nothing to do with security. One of the charges was from Robert that claimed that I owed him for 20 additional years rents for abandoning my school on his property. One of the other charges was John McBride who claimed he had put all that money indicate as an investment. But he failed to tell the court or the Atty. Gen. that it actually stolen the money back from his partners Terrill and Scott. An additional charge was a videographer who claimed I owed him for a two-hour movie which is unusable since you could not see anything except where in his video at alleged almost $20,000 in damages.

Looking back it all seems to hinge on my telling them I would not work with him. After two years of court battles and 12 crooked attorneys in Utah the judge ordered a psychological evaluation done by two court appointed and approved psychiatrists. This was a complete joke. Both psychiatrist or should I say clinical psychologists worked for the court. And they knew what the judge wanted so they use the same forms they use for hundreds of other people and added a few sentences. I know this for a fact since I looked at many reports from clinical psychologists of other people at the Utah mental hospital and you could all the pages up they were identical. But the judge wanted me locked up.

Utah law clearly states that no one can be held in Utah mental hospital in the security section for more than one half years. But I was detained for 3 ½ years. When Sen. Butters came in to find out why I was still being held the people of the hospital paniced and began the paperwork to get me removed as quickly as possible.

While they drove out every tooth in my head and said they would only fix the teeth if I signed the patent over and I refused. 2 ½ of those 3 ½ years I was stuck in a wheelchair and they refused to give me medical attention. The simplest of terms I would have been treated better at Guantánamo Bay that I was by the great people in Utah.

When I was been taken out of the hospital that last day they did not want the public to see the broken wheelchair they made me use for 2 ½ years so they wheeled me out in a secretary's chair with wheels. When I arrived at the court I was given crutches and peered into the courtroom.

The judge was furious. He wanted to know on whose authority to the hospital release me? But the Atty. Gen. office said that state law would only allow me to be held for one and a half years and they realize the judge had made a mistake in holding me longer. With this you can see the judge to get even madder. He also saw that the audience in a courtroom was a pretty full audience and they were all there for me.

Then the judge asked well does anyone have anything else that we can charge Mr. Pantone with today? And the answer was no. This is the same judge who refused to recuse himself failed to tell me that he was in charge of the ethics committee when I filed a complaint against him and said the Constitution and Bill of Rights of the United States do not apply in his courtroom.

You made it very clear that I was being released but the court still finds me incompetent to be charged with anything from that day on. And if I ever tried to file a legal action against anyone involved in this case that I would be immediately arrested and charged for the securities fraud and anything else they could come up with.

I asked the judge if I could get a copy of that order so I can leave with it and he told the clerk to prepare it and he signed it. I was very nervous leaving the courtroom and the courthouse knowing I might be rearrested at any time. Several other people I've known not just in Utah and then arrested for possession of drugs or other made-up charges simply because they cops were ordered to do it. Once I let the court property I switched drivers and cars several times for the next three hours. Then I loaded all I could in the back of friends Van and I got out of Utah before the sun went down.

For about 2 ½ years I was allowed 10 minute calls a few times a day when I wasn't in solitary confinement. I did get to speak to my son quite often, David, who is trying to help me get out with putting together videos and calls in some of those videos are still up on YouTube today. I also spoke quite often with a guy named Forrest Pittman. Court claimed he was an inventor, life me. And he bragged about all of his great inventions for many years. Later I found out he never invented anything in his life

Chapter three; No trees brain cells in this Forrest

Forest promise me a fresh start in life as soon as I gain my freedom. He told me that his parents died they left him a home in Duncan Oklahoma, and 160 acre ranch about 15 minutes south in the town of Comanche, OK. He said if I agreed to pay a fair market value, I could pick either one and I did not need any down payment.

Now that I had my freedom I was heading for Oklahoma. I went to Sprint store within one hour of getting out of court and I asked if I could get a phone under Forrest Pittman's account? After the clerk called Forrest I was given a phone and phone number. We got in the van and drove to Oklahoma. A friend help me make escape from Utah but when he said he had to return to be at work the next day we had to change her plans and he had to drop me off in a town close to the Texas border, where Forrest met up with us.

Forrest came in a small pickup truck with no tarps or ropes. I was forced to leave some antiques with my friend and take only what could fit in the back of this little truck. Forrest was so broke he had the front seat filled up with gas cans he had drained from other equipment to get home. I asked first take me to a hardware store such at least by some tarps and ropes. He assured me that I didn't have to worry about anything in the back of the truck getting to where the weather was just fine I didn't have enough cash on me by more than rope.

As we drove home to his ranch I was not impressed with his erratic driving. He constantly changes lanes without signaling and would have his head turn towards you while he was talking. And even after I mentioned several times please look at the road he would still turn his head at that point I think just to be funny or he thought he was. About 30 miles from his home it started raining bad in all of my things were getting drenched. As he saw me getting more and more upset about my things been destroyed is sick little mind allowed him to laugh harder and harder and say it's only stop don't worry. We finally arrived I wanted to cry

.We parked his truck in his hangar at the Halliburton Airport. And drove off in his little red car to his mom and dad's old home in Duncan. Upon entering from the back door the odor of mold is strong enough to give me a headache within 30 seconds. He said not to worry about it you get used to it. He opened the door to the front bedroom and the house said I can sleep there. I immediately opened the windows not caring how cold it was outside to get fresh air. The next morning he insisted we take a bath before we head back to his ranch since he did not have water and power working at the ranch

.I didn't take a shower, but I felt dirtier getting out of that shower and using his moldy towels that I did before I took a shower. While I waited for him to take a shower I stayed outside in the cold wind. Junk junk everywhere, he was a collector of junk. We went back to the hangar got the truck with all of my wet stuff and drove to the ranch in Comanche. He unlocked the gate and we drove close to the side door of the house. The weeds in the yard were about 3 feet high blocking the view of all of the garbage and equipment that he had lined up around the property.

He unlocked that have blocked on the kitchen door and we went in. Once you stepped over the batteries in the kitchen there was a small path that would allow you to get to the rest of the house

and junk everywhere. My first impulse was to claim and get the house in order so that it was a functioning home but since I had not walked for 2 ½ years I was unable to do anything more than sit outside the coat on. There seem to be all the forest wanted to do. He wanted to sit and reminisce about the good old days when people really wanted quality.

I was surprised to say the least at his living conditions. And every day I was surprised even more. I asked to be any copy sure I do it in the kitchen and I went to the kitchen and he had a little tiny jar of Folgers instant coffee. He had some dirty cups Styrofoam. I decided I wasn't that thirsty. I got on the phone and started making appointments with people who wanted to come to class and learn GEET. By 5 o'clock that evening we had about $3000 waiting for us at money gram.

So we drove to Walmart to get the money. While he was filling out forms he told me to pay very close attention and I did. He used his mom and dad's address in Duncan, even though he really lived at the ranch in another city. Because the amount over thousand dollars they asked him for identification, and he presented a Texas drivers license. When I asked him for a Social Security card he rattled off a number. We got the money and started shopping

. He said his Texas driver's license was for an old abandoned shop he pretended he lived in. He also told me the end never give the establishment your true ID so he made up a Social Security number, so they wouldn't know who got the real money.

The first thing I bought was coffee and a coffee maker. Then right over to get plates, cups, silverware and other kitchen things. They filled the car with food. The only food that was at his house when I got there was a half a box of old oatmeal with little black bugs in it. Begin explain I couldn't help myself to it just pick out the black bugs and thrown back in the box that way nobody would want to steal your food

. When we first arrived at the house he pointed out that somebody had stolen a battery and some tires from right next to the stairs and he pointed to where they were missing from, but the problem was the grass was 2 feet high. Even an idiot would know that there was no battery or tires at that location for a very long time. No matter where we went he was always looking around to make sure we were followed. He told me that every time he left the ranch he always took a different route and zigzag so that anybody was trying to follow him he'd lose him

.Within a few weeks we needed a car for a long trip to New Mexico. So I open my briefcase up pulled up $5000 and we drove down to buy a car. It was a good-looking SUV sitting out in front of the used car lot. When I asked how much the salesman said $2700, and I said you got a deal that will give me to and from New Mexico I'll buy it. But since my drivers license had already expired while I was locked up in maximum-security hospital he would not sell me the car because I didn't have a current Oklahoma drivers license

.Orest said acting as my trustee he would buy the car for me and I agreed. A few days later I hired an assistant. The first month there people began cleaning a little bit more every day because we did not want to upset forest. About four hours of every day she spent at my new computer training out everything she could and putting it in binders about GEET..

Sometimes she would come out during breaks say what a great person I was. Then another time she come out as a people out there really hate me. I was fully aware of what was on the Internet but I remember my father telling me that even bad publicity can be good publicity. Some of these idiots were saying bad things about me you realize how much they were helping me. When someone reads something bad about a person their mind starts to wonder whether it is true, and that leaves them to the truth that yes I really am here to help mankind.

In early July my brother Rocky called in desperate need of an escape. He told me his wife for two children there to show their children's children and other friends were all sharing a hotel room and it was driving him insane. I asked him what he needed these only need $2500 for the trip on that particular day it was all I can spare, but I send it. A few days later he showed up in a big Uhaul.

Before he showed up I'd hired guy named David. His job was to make the property look good or as best as he could. David ways and move things around the property for weeks. It was finally beginning to look like a home. For a week Forrest kept telling me he was bringing over his beautiful motorhome so my brother could live in it until I built my new home. On the last day, as Rocky was driving in Knoxville Tennessee forest finally decided to get the motor home over there. He took David to drive one of the vehicles back.. He said the motorhome ran fine and everything on it worked.

But when he failed to tell me was that it may have worked 30 years earlier but it had been run for a long time. He ended up using a long chain and towing it back to the ranch on back roads, because it was never registered. There is no power-sharing and only an emergency brake to slow down. When they finally arrived back at the ranch David jumped out of the motorhome cussing, saying if it wasn't for me he would quit on the spot. Orest kept trying to tell him that it handled just fine and that was bullshit.

From the first day my brother was there he complained about things disappearing inside the motorhome or things left in the bathroom of the main house. My brother and I both knew that you could leave anything only around it was shiny or valuable because forests would always say that the raccoons got it. About a week after my brother got here we headed out to Albuquerque New Mexico recites conference, and Forrest came with us.

We are within 50 miles of Albuquerque and that little SUV overheated badly. I assured Boris and my brother that will help greatly on the finalist suburban and will call this one home. I invited Forrest to come with us because he claimed he had taught geeks at the conference for the four years that I was locked up. We arrived two days early and I began to visit with a lot of friends shows on a regular basis. Orest pretended he was sick and my brother waited on him hand and foot.

By the third day of the conference I had an extra $20,000 in cash so I brought my mom my brother and older suburban. He had taken it for a test drive and he liked it. Looking back I wish I hadn't bought it because all he ever did was complain about the horrible condition it was in. On the last day of the conference Orest miraculously felt better and came down to visit with a few friends of his.

The day after the conference we rented a car hauler and loaded up the SUV for the journey home. We had one guy that was coming in with us back to the ranch for training to work in Europe as well as my younger son David and at the last minute Boris said he also wanted to bring a paralegal to get all the documents not that was selected by his friend John Fiala. I explained before leaving for Mexico that I had my bedroom and Forrest and his and everyone else would be sleeping on the floor in the living room

.About a month getting ready for the show my first class it was very clear that I could not hold a class at the ranch. Orest had too many mood swings. He would explode and say things were missing but we'd all be looking for is things. And at the same time everyone else was missing things and he always said you must have misplaced it. I gotta say Forrest was pretty slick.

When the first class started I had over $40,000 in cash between Me and money and Forrest bank account. I asked my brother to start building the first building while I was in class. He phoned me up on Wednesday as a forest would not give him any money to build a building unless he approved it first. I got a little upset and I called Forrest and asked him what the problem was. He explained to me that he was number one I was number two and Rocky was number three. He said when the class was done we can talk.

From the very beginning Rocky and forest never got along it was almost a nightmare, with both of them trying to drain all the energy from me they can. By the end of the week 25 students each handing me $5000 for dealerships. I did not want to have that much cash on me so Thursday and Friday I had my brother make several trips up to get the money and hide it in his car. Of course some of the money to get deposited in the bank but I didn't want Forrest to get his hands on it again.

About three days in the class called me up and told me he had built the first generator for my class. I asked him how on earth he could build it since he didn't know anything about GEET, or how I wanted that engine built. He told me he had followed the free plans. At that point I knew that I cannot use that engine is show up technology, before ever seeing it. That afternoon I brought the class out to the ranch to see the engine and show the class where I was living. In an effort to impress me forest had broken the governor on a brand-new $4000 generator. And it was clear that he did not know anything about how to build a GEET.

I was able to show the class what not to do and I explained why. This hurt forests feelings very bad and he began to make life for everyone there is miserable as he could. I then explained to forest that I did not see any way that he and I could work together says he is trying to run everything and knows nothing. Every time I would say I want to build something he wanted to change it so it was his he didn't want to have a big classroom and school where you want to have his personal hundred thousand square-foot playroom, that he would let me use a few days a month. But he also stressed that my students couldn't touch any of his equipment, and he would be in total control of everything on his property

. I propose letting them keep the ranch house and barn and his junk on the 3 acres he needed. I offered him $1000 an acre for the remainder of the 160 acres with the condition that I feel I paid him in full I would give him a minimum of $3000 a month and pay all his utilities. He agreed to

this in a hurry and asked his paralegal to draw up the papers. Two weeks later it look like we were almost ready to sign contracts and forest moved in a guy/girl as his new girlfriend. My brother and all of the employees did not want anything to do with him/her.

To get this person to move in with him or us had promised that they would be in charge of all construction on his property. This was not in our agreement. Was in any part of our agreement. The paralegal took the papers after they were signed down to the county recorder and they refused they were improperly done and had to redo them three times. I can see there were many problems with this paralegal but I didn't know what exactly they were I could not put my finger on it. So once the paperwork completed I asked him what his intent was. That is when he produced about a 60 page document turning GEET into a new corporation that would hire me. But it would be owned by him and forest.

After he said this I asked my brother to take them down to the car lot and get in car for around $1500 and let's get them on the road his services were no longer needed. Rocky called me up a little later from the car lot and said he did not have a drivers license. At that time I asked to speak to our paralegal, and he took Rocky song outside the office into the parking area and explained to me by phone that he may have warrants for his arrest for failure to appear for probation. I suggested to pick a company name and by the car in the name of that company then get insurance for that company immediately and get back to Utah where he was supposed to be.

When he returned to the ranch I want to back and asked him privately what the probation was all about. He explained that it was for having sex with a minor. This threw me into a panic to get them off the property immediately since he had been spending two or three nights every week camping out with a 14-year-old boy behind his mother's house. We went back into the house I told him to gather his things and leave.

The following day around noon I received a call and he explained he had just been pulled over by the Highway Patrol in Texas. He said if he was arrested for being out-of-state and not having registered as a sex offender he would probably be in jail for a long time and that I should come get the car. But a half-hour later he phoned and said you somebody else's name and they gave him a ticket for speeding, and he was back on the road.

I ordered a truckload of lumber and my brother and I began building a guesthouse. We built it as a portable unit so that it could be moved to the property we were buying or supposed to be buying from forest. We ended up spending $36,000 to build the building. I held a few more classes at the Holiday Inn in Duncan each time with 25 to 30 students. All the money for licenses if not in cash was given to a local lumberyard to be applied to my credit. By November I had amassed almost $200,000 in credit at McCoys lumber.

We are at a local guy and his team to build our new home and shop. Rocky and I went out and found a nice trailer that we could use upon the property by a new shop until we can afford to pay cash for our new home and we put down $5000. After placing the deposit, Cora said he would not allow any mobile homes or portable buildings on his property and if I couldn't pay them off the hundred and $60,000 I own and that he would not let me bring a motorhome or mobile home

on that property everything had to be fixed to the land. He said he was afraid that we might pull out of the deal and therefore all improvements were going to be his if we bailed out of the deal.

Since I did not have a problem just building a home in Rocky agreed we decided to go ahead and build a home attached to our new big garage. The garage was 30’ x 40’ with all to buy six walls, and an extra thick steel reinforced slab that would not crack. About 20 feet from their we began construction of a new living room. Then we made the bathroom and laundry room in the center section is always going to the garage. Living room with about 30’ x 50’. At one end of the living room we put doorway going out to my brother’s bedroom which was about 24 x 36

.We kept adding on as we had the cash to pay for it as well as all of the other expenses we needed so that we would not be caught short. I continue teaching away from the ranch until the house was done. One day in December while I was teaching at the Holiday Inn I received a call that forest in his new “girlfriend” had just been in our house and one of the employees overheard her saying that she loved her new bedroom.

Why employees also told me that forest had gone through my house and was photographing all of my tools and equipment as well as all of my employees. I took a short break from the class and went outside and iPhone forest ask him what was going on. He said if I missed a payment he would throw me off the property because his girlfriend wanted our house. He went on to say that Sentry is now supervising the construction of the house she wanted $750 a week. I don’t we could discuss this with class was over and I would be there Friday right after class

.At this point I knew there were going to be many other problems so they went to forest house I always had a tape recorder in my pocket taping the conversations. On tape I explained to forest that every time he accused me or any of my employees or friends of stealing from him we always stopped and took the time to find whatever what he was looking for and usually it was right where he had personally put it. He then alleged that my employees had stolen and food from his pantry. Since I was the one who bought all the food I went out to the garage got my receipts came back and we went down the list. Once we checked off everything I went to his trash bags and his trashcan and lo and behold nothing of his was missing.

I then told him that I was fully aware that he is taking tapes and other things from my home and my construction site and they were in his possession.he denied it I said his girlfriend into his room and asked her to bring out any money videotapes that he had and she did. Forrest had of opening his videotapes carefully to not break the seals so he could return them and get new ones claiming he had never even opened them. My videos were always cut to the center of the security tape. I asked her how many of those tapes have the seal removed and she said only one then I pulled the receipts out from the pond shop and Walmart and I read off all the titles she had several of them in her hands

Forrest said he had bought them, but even his girlfriend did not believe it at that point. She tried to point out that maybe he made a mistake and just borrowed them. I asked if that was the case with all 12 or 13 and the WD-40, where all the gas, or other things we were missing that he had conveniently stored inside his buildings and cars.

A few days later my brother and I were getting ready to go up to the main house from her guest house when the phone rang. A truckload of our employees was stopped at our gate by forest with a 50 caliber rifle. He threatened to kill them if they trespassed onto his property he said he had canceled any agreement he had with me and my brother and was reclaiming his property. I found the place immediately and they came out. He appointed that rifle at about eight people that day including me and my brother. Yet what GOT there they want to talk to any of us only Forrest.

They wouldn't even take a report of the incident, except to say that we were trespassing and we needed to get off his property. One of our employees a man named Mike offered to go up and talk to forest and help us get the matter resolved. He came back about 30 minutes later and said we should not have told his girlfriend that he couldn't have a hot dog and a sauna in the new bedroom she wanted us to build because she wanted a home nicer than ours. So because we refused to build a $50,000 bedroom for him we were being evicted and he was canceling his agreement with us.

Mike went on to explain that we only had about 20 minutes to walk off the property in the snow and leave everything we own on the property or he would shoot us. Rocky called the sheriff department again and informed them that we were under a death threat from forest and we needed their help. Two officers showed up and one was very irate he pulled his gun out of his holster as he approach our front door and told us we are trespassing I explained that the entire building we were standing in was a temporary building to be moved to the upper part of the property and he said he didn't want to hear any of this bullshit

. The officer also told me Mr. Forrest Pittman is in fact a reserve deputy sheriff and doesn't lie. I told the officer my brother and I would gather personal things and we would leave. The officer said the vehicles were owned by Forrest Pittman that if you let me go out to the glovebox to get my insurance because it is not Forrests vehicle. I also told the officer that Forrest has a Texas Drivers License and it is an abandoned property, as well he has NO INSURANCE and has accidents.

The belligerent officer told his partner to keep us in the house while he went over and talk to forest. About 10 minutes later he came back saying he wanted to see the insurance. After looking at the insurance card he handed it back to my brother said well I guess he property really didn't know that you insured the car she said there's no insurance on it. But since you have proof of insurance I will let you drive the car off property and you can each take one bag you may not take anything else out of this house and I have to inspect your bags. My brother insisted on two bags since one bag is nothing but medications

. After making yourself everything out on our beds with just are important documents that were addressed to us then we were allowed to leave. As we walked out the door the officer informed us that if we came back to our property in our home we would be arrested for trespassing. We went to Holiday Inn and rented two rooms. I then prepared a summary and contacted several attorneys. One attorney said he could get the job done immediately and we could be back on the property within a matter of hours but it would require $10,000

. I phoned back a few days later: the most I can raise on a short notice without any paperwork was 6000 and he agreed. We met that afternoon. The following morning we went before the judge to explain why we needed this ex parte hearing. The judge ordered that we be allowed back on the property and the gates be unlocked immediately. Forrest would not cooperate, saying that he had never appeared in front of the judge and therefore that document with worthless. This happened the day after Christmas

.On New Year's Eve I received a call at 9:00 PM from one of my employees named Andy. He said he had just written by our guest house and witnessed Mr. Pittman leaving with a briefcase. It took almost a month before we can get possession of our home again and when we returned there was ice in the toilet the TV and water damage and everything in the fridge had rotted. All of our videos and personal items were missing, or damaged. The police again refused to take any written complaint from me and my brother. It was during this time that there was an ice storm in power was knocked out to most of the counties around there and change your front porch with our generator that we couldn't get to. The when we return not only was the generator missing so was the chain,

When we got to the main house there were so many things missing we were not able to do a full inventory until such time as items that we had purchased were needed. By April we were ready to go back into teaching. It became very difficult as Mr. Pittman would constantly harass her students scream obscenities follow them down the road after school or intentionally blocked the road so they couldn't get into our driveway but no matter what happened we were told we couldn't file a complaint against him.

On one occasion at a film crew who is doing a TV special on this new technology and they were scared off when forest told them that he had every right in the world to shoot them for trespassing. The filming ended shortly thereafter and it never made television. Mr. Pittman did everything in his power to destroy our income by his actions and slanderous comments

.We had to fire Mr. key after he informed me that Mr. Pittman and his family had been lifelong friends. He also told me that he had represented Mr. Pittman who claimed he had a brain injury you failed to tell me this when he took my money. He did not return all of our documents and refused for over a month to file a motion to withdraw or notice to the court. This was stopping us from being able to get another attorney since no attorney would even talk to us as long as he was the attorney of record.

When one of my students overheard this she told me that the man who is running the campground or she was staying was the retired judge in that county judge Hagel. She took me over to the campground and introduced me to the judge. He said as a friend not a judge he would review the case. There were several times during this discussion the judge Hagel said no that's not possible. He kept saying the police had to take reports and having guns: employees with sworn affidavits the district attorney should have done something. He also went on to say that the Judge should have gotten involved at that point.

Send a grand jury all of this information and heads would roll. The criminal acts against me, start with forest, and sheriff and goes on. I told him I had recently filed my own response to the court

and I let them read it. After a little laughing, he said I seem to understand the basic law but it would sure get a judge upset by really file that. I told judge Hagle I had filled it. At this point he said he wanted to go to court with me and explain my frustration in words that were acceptable by the court, and I agreed

The day after seeing Judge Hagle, Mr Key returned most of my documents. When her next court date arrived, Judge Hagle was with me, and the courtroom was packed. There were probably seven or eight attorneys sitting up in the jury box. But when we walked in every attorney in the courtroom stood up, even the judge stood up and they all bow their heads to judge haggle. The case it was being heard was put on hold while we walked up to the front and the judge said our case would be heard now. Everyone got seated

. Judge haggle explain that I had to file my own papers, since my old attorney had failed to properly file notice with the court in this action. He also said if you would please the court I would withdraw my papers, and find a new attorney so we could go forward within 30 to 60 days. The judge on the bench asked if I was willing to withdraw my papers at that time and some time for a new hearing and I agreed. The judge thanked Judge Hagel for his personal assistance in this matter and the courtroom

.We went across the street to the courthouse, where the judge shared building years ago with another attorney Mr. Russell. Mr. Russell agreed to take the case on and we set an appointment over the case about two weeks out. Mr. Russell was the most disorganized attorney I never met. Some parts of the case that we've gone over several times he couldn't remember a week later. There were a few times that I asked Mr. Russell file documents and after two weeks I was informed that the law didn't apply what I was saying. I would then go to his office with copies of the law highlighted showing him that that is what the law said, and he was not aware of Oklahoma law?

It was about this time that one of my employees and gotten in trouble for assault and wanted me to help close bail. I told my call my attorney and have him do that immediately, and he said forget it. When I asked him why he told me that about five guys in jail were waiting for Mr. Russell to file papers and he never gets around to finishing anything at all of these guys just sitting jail waiting

. At that point I could see I was in the same boat as a lot of those guys sitting in jail. I called the Bar Association up trying to find out if they can recommend any attorney that would really represent a client. They suggested I use an Internet attorney form and attorneys would call me up

I used the service they recommended an attorney named Rick Moore phoned me back. Since he lived about an hour and a half away from me I offered them $400 for our first meeting he would drive down and spend four hours. He agreed to come down the following day and be there around noon. He finally showed up about three in the afternoon and said he had another appointment he had to rush back for so you'd only be only spend 30 minutes but if I could give him the papers he would read them that night and get back to me the following day. He demanded the $400 saying that if I wanted a bulldog with sharp teeth he was the guy

.About a week and a half later his assistant Shauna, said she was coming down to file papers on my behalf and would be there around noon. She arrived at noon and said she needed to use my computer to prepare the papers. She spent 3 ½ hours preparing three pages that should've only taken a few minutes. When I saw what you prepared I recognize that none of them were done correctly. She did not understand anything about this case, so we sat in the main shop area and discuss the case for about two hours. It was during this two hour. My brother walked into the shop and was embarrassed when he saw her low cut top with her kids Hanging out and as he walked around behind her have to crack of her but was visible above the belt line

.My brother motioned for me to step outside for a minute he has something personal to ask me once outside he asked me where I got this hooker? I explained to him that this was one of our attorneys, and he looked like he was in shock. She had tattoos all over her back her belly her breasts and legs and she did not in any way shape or form look like an attorney. But my brother didn't think she did look perfect little is just what kind of perfect.

About a week later she returned to file the same papers again. And again they were not completed so she had to redo them on my computer. This time it only took three hours. We went to the courthouse and file the papers if you just typed, and demanded all the copies be handed to her. Court clerk looked really confused saying don't you want the sheriff to serve the papers and she said yes but I want to personally walk them in. The clerk smiled and said the cut off time that papers served is for 15 it is now 416 so I am not when you do that for you until next Monday

.Shauna and I went downstairs to the Sheriff's office and the clerk there smiled limited to papers and handed them back said I'm sorry we don't serve papers like this to get papers or you have to have the clerk bring them down to us. With this Shauna handed me all the papers and said you have to serve them yourself. With what little I know about law I know you can't serve somebody yourself.

The following Monday I went back to the court clerk and had the process done properly through the clerk. But little did I know at the time the papers were not made out right. When the errors were caught I notified Rick immediately and he told me he would take care of it and I shouldn't worry. I went to the next hearing with Rick and everything I had bought for with the first two attorneys got thrown out and now the court reversed its decision I no longer was in control of my own home. It was very obvious Rick did not know what the hell he was doing

. Rick followed me to my home and wanted me and my brother to sign a deed as collateral for the land and wanted Rocky and I to sign the deed for the land and structure that the judges ordered was not mine. While we discuss this, my secretary was sitting just a few feet away and listening in on the conversation when Rick turned toward me and said I can make this case much easier. I asked how these are just only storm blow that son of a bitches brings out it'd be easier to defend you on a murder case that would be this land problem because I know how to handle murder cases. At that time I told Rick I didn't think I needed his service anymore

. A few weeks later I get a bill from Rick saying that now I owe him $40,000, for services rendered. Yet in my secretary he said I only own in the thousand $120. A motion to withdraw was filed and Shauna showed up claiming they were quitting because I owe them $40,000. And

in chambers I tried to object and the judge told me to shut up. It would seem that the judge has read the latest issue at that time from the poverty of Southern poverty Law Center which clearly states that my brother and I were running a terrorist training camp it also said that we had machine guns on the roof in underground bunkers. The Southern poverty Law Center was called by the local sheriff to do a story on me to destroy my reputation and me.

The finale of the story was where the writer said the only way to get rid of scum like me and my brother was to blow the house up while we were asleep then the problem will go away. Looking back I could file a lawsuit against them, but how soon before my house would be blown up while I was sleeping? I decided it was time to move that we packed up our trucks and got out of Dodge. Three months we stayed in a hotel in Bernalillo New Mexico.

We moved to New Mexico and found a house. Charlie Montoya offered to sell me his home for a reduced price of $250,000, if I would allow him to use the front bedroom and the big garage or a month or two while he relocated. Since the appraised value was over $320,000 I thought that was a bargain. I gave him his $10,000 and down and agreed to give him $5000 per month for one year then came off in full balance due. 11 months later we were prepared to close at the title office and only needed his signature. He refused to sign.

All of a sudden in the middle of March and we were no longer buying his property we were simply renting it and even though he has taken $70,000 cash he was calling that rent be able to use only half the house. His timing of trying to get out of the house sale was when Wilson Kirk and Doyle Yancey came to visit. It was during this visit that my head employee Javier made an offer to work for Wilson Kirk building GEET.

I informed them that that was not possible since they did not have any agreement with me and signed. But I did offer to train Wilson Kirk and enter contract if he was prepared to put down 25% of the licensee. He said he did not want to be a licensed dealer. During his visit Wilson Kirk gave thousands of dollars worth of Doyle Yancey's art away to other people without permission. Doyle was stranded with no way to get home and no money for food. Doyle's son bought him a ticket to fly home I had My Secretary Dr., Doyle back to the airport and gave him money for food

.When I found out that Wilson is given away all of Doyle's property I paid another couple hundred dollars to get all his property back from Javier's brother. When his containers of our returned it was very apparent that quite a bit of it was missing. I have my oldest son Jason drive all of this scrimshaw back to Kentucky, along with GEETed up engine. While there my son ran the engine on coal dust mixed with water for a group of Doyle's friends. Doyle wanted to pay for the engine so he paid my son by giving him some custom-made knives.

A few weeks later on the air was arrested and spent several days in jail. Javier a few months earlier he didn't even have a car, so my son bought him a truck and told him he can work it off. Once he was out of jail is going to be deported because he was an illegal alien. But the next day he was out with no charges and wanted to come back to work I told him we did not need any help anymore. We received complaints from neighbors that Javier was buying drugs over the back wall and using drugs on the job he was also supplying rugs to her secretary was also

terminated. Upon termination both of them let the cat out of the bag that someone was coming after me to steal GEET. When confronted Javier said he got that word from her landlord. That would explain why Charlie refuses to move his stuff off the property after his two months was over.

I found it very difficult to trust Charlie since he was cheating on his girlfriend, lying to his wife, and lying to me and my son. At one point he invited the sheriff over the house because he wanted me to see that he knew the top man. When we started trying to get Charlie to own and sign the papers and we could buy the house Charlie told me he wasn't gonna sign them and he wasn't going to sell me the house and he wanted me off is property immediately or he was going to have me arrested for trespassing.

This was quite ridiculous since he already met with the title office on several occasions and openly admitted that he did sell me the house and we had paid $70,000 and only can do was 190,000 so how on earth can he just by saying were squatting, or trespassing. He then signed papers with another woman named Judith and she arrived at the property to show it to someone wanting to invest money, while I have it in escrow? This other gentleman and his wife were there about a week earlier and he was looking at buying the property for his son and stepdaughter. Only last time when he came I had two students and I was busy so I just said hello and Charlie showed in the house.

I really thought it was nice of Charlie at the time to be showing the house when I have students so I would not be burdened with all of these hard money lenders. But what Charlie forgot to tell me is even advertising the house for sale for three months before he told me he wasn't selling me the house. These investors were not coming to give me alone these people were coming to buy me out and throw me out on the street. And this time I did get involved in the conversation and I could see that Judas was getting very unhappy and told me to shut up. I told her I was the owner of the property and I had no intention of selling it it was in escrow and I was prepared to close

. She informed me it could be in escrow because she bought it and Stewart title didn't care if Charlie had an agreement with me or not and it was now her house and she was going to sell it. She said her and Charlie had gone to Stewart title and a guaranteed they could close the deal on Charlie's words. Charlie seem to have a lot of dirty connections

. I asked everybody to get the hell off my property a day I called the City of Bernalillo Building Department, and asked for an immediate inspection. The inspector said he would come right out because it sounded urgent. When he arrived I want him around the house and explain what I have found out in just the last 24 hours that Charles had moved a wall at the north end of the property in 6 feet, making the big garage appear to be on his property. But the surveyors report that I had just received proved that the garage was actually encroaching on County and the neighbors property

.The building inspector pointed out the electrical did not appear to be legal a toilet area in the kitchen area was illegal. Having no windows in the living room area was illegal. Having a wood-burning stove or pellet stove in the master bedroom was illegal. And the stairway going upstairs was also illegal. It was his professional opinion that the house was never inspected, and there

was no certificate of occupancy ever filed. Hearing this I did not want to buy the property I just wanted to get my stuff off the property as quickly as possible I call this other gentleman up who said he wanted to buy the property and told him what was told to me by the building department.

The man laughed and said he been a contractor in New Mexico for many years and because of that he had no interest in buying that house unless it was just the bare land. He said it would cost more to fix it then it would ever be worth. And I have to agree. Charlie had pulled the con of condoms but why. It appears now he did sell it to someone else and of course the attorney I hired didn't file any paperwork that he was asked to do but he sure could come back and ask for another $10,000 I think that's what attorneys are supposed to do is just keep sucking money out of you without doing their job.

That attorney claimed that he had used up all the money I gave him trying to get Charlie served and after one full year he needed another $10,000 or he was gonna let the entire case be dismissed by the end of July. Well as luck would have it I began moving and the end of the first day is best buddy the county share showed up

.I was sitting there with five very tired man with the moving stuff all day long when he walked up. I asked if I could help him, and he informed me that he was just coming by to let me know that I needed to get off Charlie's property. I then asked him how is it that the County Sheriff is trying to enforce laws in the city for a best friend when city police had jurisdiction and he didn't. Before answering that he gave it some thought and then qualified by saying I'm only here is Charlie's friend not in a can official capacity.

With that I told him the reason we were leaving was not because of Charlie's idle threats but because of his criminal actions and I asked the sheriff to follow me around and I showed him the bathroom off the kitchen I showed him the stairway that is illegal and Tuesday I showed in the electrical panel that is over wired and I explained to him how the property lines had been faked by Charlie. I told him that everything on the property that I could see and the building inspector would have to be replaced and most of the walls torn out or an inspection

.But when I asked him if he was going to make a report of all of these criminal actions you said it wasn't his jurisdiction. He seemed to be very upset because instead of intimidating us we were intimidating him. I told him we would be off the property within a few days but I would be filing liens against the property and legal action against Charlie. He said if you can't find them you can't serve him. So now hearing that all the process service for a whole year couldn't find it wow isn't that funny. A new all process servers is insert so many times it isn't funny but what goes around us come around and Charlie yours is coming. I moved back into the hotel while considering what to do.

I have conference to do and two more classes in Albuquerque so I stuck around for those. Then with my son Jasons' help I moved to Kentucky. And about a week after arriving in Kentucky yesterday doing classes only one or two people at a time from my hotel room. I also hired a new secretary named Sabrina. She was a really cute little Korean girl with two children. She was a very good lady and was very devoted to her Fiance.

Sabrina did all she could to find me a new home. There were some days we you are looking for homes and be in the car almost all day she knew certain things bother me if she avoided those typically bad habits some drivers have

. There was one house that she found, that was down a winding dirt road next to Creek and I have to admit it was spooky even for me. But I couldn't see too many people wanting to go down that road bother me but the house was not suitable for my needs.

It was really sad to think that somebody who's a real estate agent would waste their time and yours to keep showing you homes that are occupied when you tell them I want a home I can occupy today and they don't seem to listen to a damn word you're saying all they can think of is I want to make money and make a sale and I don't think you're serious I think you don't mind staying in a hotel for another month or two. They should have real estate training school where they're taught to open their ears and follow simple instructions.

Finally after three months of being in the hotel we found a beautiful home it was originally built back in the 1830s and is a Southern style mansion with a few outbuildings. It was part of an estate and one of the elderly owners like what I had to say and thought accepting $10,000 down on the spot and the balance due in 30 to 60 days sounded good. But I needed immediate occupancy even if it was only the small house 01 bedroom on the front of the property

.I should have known the deal would not be accepted when I saw the note that we were meeting at Coldwell Banker. I've never met a broker from that company or a salesperson from that company that was willing to compromise or budge. And this one was no different. He advise the other two owners to not accept the offer and just wait 30 is 60 days until all cash was handed to them that once then make the deal.

With a counteroffer I thank them for their time I got upset if I find a house before the money gets here, otherwise I'll see you in 30 to 60 days. A few days later I bought a house and they accepted $10,000 down and the balance in 30 days.

But after our offer was refused on the nice house a student and his wife had overheard the conversation,, and offered to buy us the home I want. His name is James CER RI LL I,and his wife Shelly. I told them the company in Japan and offered to buy us a home and all expenses to get the shop up and running. He said he would match the offer right now and was willing to work with the guys in Japan. The company Japan did not want to work with him. But again he offered

.I explained to James that if I gave my word to anyone I will live up to it this man in Japan had until 5 December to come up money for the house. But before December 5 came called and asked if he could extend that to the 15th and I agreed. But I also informed him that if he was not willing to send me a commitment by the 12th I did have another offer that I would be accepting. Are people in Japan wrote a very sincere apology letter for having held me up and delaying my getting into a home and asked for forgiveness. And forgiveness was granted.

I then phoned James and his wife and informed them that the other company in Japan had bailed out. At that point James said to getting the phone number and names of those parties involved

and he would immediately wire the money to pay for the house in full. I took my own money and plays $10,000 down for the house located at 16827 Herndon Oak Grove RD. in Oak Grove, KY. Forwarded all of the information to James and told him we would need probably two more buildings on the property to accomplish everything that I needed to do. I was to receive $7500 per month as payments for keeping dealerships off the market. I would still be allowed to hold regular classes for anyone who wanted to use it for personal use

.We moved into the house shortly after 15 December and during the first month the propane bill was about $1800. The disclosure form did not reflect problems and defects on the property. There was no insulation in the walls. The first three months in that home was worse then camping out. Whoever had done the plumbing and electrical was not qualified. The list is too extensive to go down at this time. Since I had given James a copy of the agreement with Japan there were no questions except to what extent did you want to be involved.

Due to freezing conditions and efficiencies of the house it was over three months delays that were not counted on in getting things done. By April we were finally getting to the point where many of the projects could be built, but we had to locate suppliers for the parts.

In February a man claiming to be an inventor, Mr. Steve Tichi, from Everett Washington claimed to have breakthrough technology that he owned. He told me that he worked for many years with a man named Nicholas Naslund. He claims that before you get to perfecting his new filter Mr. Nesland fired him.

I sent Steve $600 through PayPal to cover his cost to fly out for a week. Once there my home Steve talked about everything he could to convince me he was an inventor. And I must say he was very convincing. He was also very annoying. Prior to is coming out I had told him we were having water problems and sewage problems and heating problems and all he could do was complain and when he did I offered to put them in a hotel and he said no.

I have been dealing with inventors for over 37 years and I have never met an inventor that really understood how much it cost to build something. They never calculate in travel time car expenses insurance lighting food the little things in life. Though he told me that he could probably build is the filter for around three to $6000, and I chuckled. I knew it would cost closer to $15-$18,000 just by what you described. I phoned James and told him, about 20,000 would probably be in order to cover this inventor to get the first commercial oil filter that would purify oil down to a half micron.

He said that sounded fair and have the guy start on it immediately and he wired part of the money it was in the rest as needed. Over the course of the next few months we stayed in touch and he would periodically bring me up to speed on where he was out of this filter I kept trying to tell them I was not going to ask for or receive anything from his filter that he wanted to do anything he could just reimburse me the $600 I spent a game out there the first time and he agreed he also said he give me a bonus of 3%.

James paid for most of the first building but not for the ceiling, plastering and painting. I did quite a bit of work on the main house and began on a 30 foot mural in the living room. I never got a nickel for any of the improvements we did while there.

Steve came out again to deliver the first filter. He had also invited out a guy named Dave to demonstrate his inventions. While there we found out they weren't really his inventions either. In just two days I caught Steve and Dave lying so many times, I no longer believed anything they said.

Steve told me later that when Dave went to James house to demonstrate the technology that James told him he only wanted technology for his buildings. Steve also told me that James is getting all of his guidance from this other inventor who claimed he knew everything about energy. He called to warn me that I should not send anything to James but I don't want him and his new and better partner to reverse engineer and patent in their own name or I would be screwed severely.

Steve also told me that James and his partner in Germany along with James wife, Shelley and ripped off a casino in Macau. He said the total was about $900 million. Steve also told me that James has the ability of getting new ID so that you can hide in Canada. He said James real name is Carvalho or Carmelo's cerrilli, and if I would look it up on the Internet I would see why you didn't want to work with Microsoft because they just sued him in one $1.8 million in Toronto. I was now getting very nervous in my working with and what are the real intentions.

Around the end of July I got a call from James saying that Steve was coming down to pick up receipts and even those custom building projects that I was building for James. This made me very cautious I immediately had my son remove all of the dealer license contracts or agreements from my house and hide them in storage. We copied all information of all computers and put it in storage and make copies of the receipts so we can keep the originals that I still have today.

Steve showed up a few days later and demanded the receipts and all other collateral that James and demanded. While he was at my home during the day Steve did everything he could to convince me that James was a crock. On the second day he was there came in and said the hotel that James booked him into was a flea bag hotel with nothing but hookers and pimps. He was acting like he wanted to stay at my house but I made it real clear I didn't want company. I did not tell them the truth that I didn't want him on my property but I sure didn't need any more complaints about the plumbing or my cigarettes or maybe I snore too loud

.By Monday he was ready to leave and we loaded up James engine in the backseat of his car.my new secretary gave him copies of the receipts that we had. And he bummed a couple hundred dollars to cover his trip. We were all glad to see him leave. Two nights later I received a call to James saying he was at the hospital with his mother-in-law and needed to send money to Steve I told him I could help with a couple of hundred dollars on PayPal and he said please do that and I did $250 more.

When Steve told me that he had four flat tires on his rental car I knew he was fully shit. And rental company would repair their own tires even if it was all four of he then said he drove to

Boston and New York and hid our generator in all receipts and all the other inventions at a fire department I knew this was a lie as well. Because after 9/11 the rules for fire departments in New York was no more personal items were allowed on firehouse property.

Why he was lying I did not know.

I'm BEING ROBBED!!!!

On August 11 at around noon an SUV pulled into my driveway. I went outside to see what was in the guy said he was new to the area and was looking for someone they could do stucco work. I told him I didn't know anybody that did stucco work in the state. He then pointed at our trainer in the yard and it mentions stucco work. I told him we bought the trainer off our last landlord and never got around to play all the signs off of it. After talking with them for 10 minutes or so, yes what I did for a living and I told that I'm a teacher I teach plasma physics

.Since he very interested shown in the big engine I have the garage digesters outside and then I invited them into my home and we exchanged phone numbers. You have to be come back at a later time if he called first and I said yes.

The secretary went home around 3 o'clock as always. And I prepared for a one-hour class with my student from Australia. During the last two months I was very doing all my classes by Skype one hour every two days in this way I don't overload my students. I've got about 45 minutes in the conversation teaching when I heard a knock at the door. I excuse myself for just a moment open the door to find out what was while my student waited and watched on Skype.

The guy who would been there earlier and come back to three more people as anyone to talk to me about working with me in my technology and possibly going to school. I told him I was just finishing up with the student and I asked him to make themselves comfortable in living room

. When I got back to the computer my student seem to be looking over my shoulder at the people just walked in and he acted very uncomfortable. He suggested we continue the class tomorrow and I should take care of my guests immediately. When he saw made him very uncomfortable and he called his local place in Australia and they asked where was I located? He didn't know. They told him to call back if they can figure out where I might need help but he knew I needed help.

I went and sat in the living room and the only spot that wasn't occupied was in the corner the furthest corner from the door. We chatted for maybe 10 or 15 minutes then the door opened and Steve Tichi walked in. He gave out a nice healthy laugh like you expect Santa Claus. He smiles and I'll bet you didn't expect to see me did you and I said no what are you doing here. As I started to stand up Steve told me to sit down and he pointed at his friend who had a gun pointed at me. It looked like a 9 mm and I sure didn't feel like arguing with a 9 mm so I sat down.

During the next 6 ½ hours Steve told me that my only chance of living through the night was to beg Yahweh for forgiveness. He told me that he knew I've been having affairs with Hookers. I said I wanted to clarify that before you go any further. Before he could answer I explained to him that I haven't got invited several Hookers over to my home over the last four years. But never for sex. I was looking for a companion. Someone to share my house with. With no strings attached and if there's something wrong with trying to take a woman off the street please tell me what it is?

He then pointed the gun at me and got really close and shove the tape recorder in my face and said you to quit having sex with hookers and little girls. I have never had sex with little girls since I was 18. That blurted out loud and clear before I could think about the fact that he had a gun in my stomach then he pushed me back and said I just want to hear you say that you will quit having sex with minors. So in order to not get shot I said what he wanted I will never have sex with a minor. Now can I please call my son and get a ride out of here? He said no and took my phone and is carrying case off my hip he handed it to his friend and said disable it he won't need this again.

He then turned toward his shirt or friend and said he wanted the silencer of the gun just in case I tried to open my mouth. His friend went out to the car and brought in the silencer and screwed it on the end of the gun I knew I could not get past for people to get to the door so I was being held kidnapped against my will for 6 ½ hours.

Steve asked me what my passwords were. I said I would show you, as I walked towards the computer he stood up and pointed the gun at me again said sit down. He told his friends to undo all the computers and line them up by the door those had to be loaded first. Again he asked what the passwords were soI made one up.

He said for all the other sites for Facebook, PayPal, and everything else what are all my passwords. Again I told him all the passwords were rocky seven. I sent I'm an old man I just turned 65 hell I can't remember passwords do you think I'm gonna sit there and try to remember Tanner 20 different passwords I just use one password for every thing. And he bought it.

He told his men to get started on everything outside and don't miss anything worth more than a dollar. He told the guys to grab my cigarette butts and beer cans, in case anyone to plant my DNA at some crime scene.

Steve then told me to head to the bedroom he said I could take some shirts and pants and underwear and socks put them in garbage bags. Then he told me to sit down on the bed because we were going to be there for a while. But Steve didn't know that I had a wind chime sitting on top of the hot water heater when you walk into the bedroom that had a motion sensor book to the camera inside. Every time I sat still for more than a minute the camera quit working. So I got a paced back and forth on the other side of the bed so I could try to keep the camera activated

.There were many interruptions of his men asking for instructions and they would pass a gun from one person to the other to make sure somebody watch me at all times and finally at about 1230 that night they walked me out to an SUV put me in the front seat and drove me down to the

flying J gas station. There at the very front of the gas station by three were a few bags of my close and some of my medicines he told me to get out and if I call the police he would come after me and my kids. Steve was acting so irrational at the house at one point even was threatening my exes. I still do not know why or how this all occurred but when this ordeal started with a gun on me Steve called James and Sid James I'm with Paul right now I want to make one thing perfectly clear I am your boss and my not. There was about 10 or 15 second delay before James finally said yes sir. I do not believe this is the case I believe James asked Steve to get me off that property.

I am grateful now that I got the book done before they came and robbed me. My patents expired a few days after my copyrights were filed at the patent office. So even if their miracle inventor could reverse engineer the GEET, it will do them any good. While it is in the bedroom they did hire a local locksmith to come in and change all my locks so I was not able to get back into my property. The US mail delivered a box the next day my front porch and when we went by later to get it it was already gone and it didn't get picked up by the US mail. Since all this occurred I have called many people who know Steve and they validated that he is not an inventor only a dreamer

.I have the receipts for everything I put in that house including the down payment. For Steve to come in and steal everything I own with the blessings of James and Shelley makes them just as guilty of this conspiracy is Steve himself and his accomplices.

About one week after I was forced out of my home and robbed Steve phoned me again and said don't you understand English stop selling your book and pull down your website or else. I don't know how far up the chain these people go, but maybe for $900 million and that maybe it does go all the way to the Atty. Gen.'s or other politicians in high office we will find out.
